Contents

Preface vii

Peter Wyder and his friends in the Villa Vesta 1952–1970: Scientific and other reminiscences
J.L. Olsen 1

Advantage of collocating research facilities: The adminitrator's point of view
H.-M. Spilker and C. Blomeyer 8

Ultrasonic modulation of multiply scattered light
W. Leutz and G. Maret 14

Multiple light scattering in turbulent flow
D.J. Bicout and R. Maynard 20

Elastic parameters of smectic C* liquid crystals
J.A.M.M. van Haaren 27

Liquid-crystal monolayers in high magnetic fields: a second-harmonic generation study
M. Barmentlo, R.W.J. Hollering, H.A. Wierenga, C.W. van Hasselt and Th. Rasing 38

Anomalous electronic behaviour of crystalline phases close to quasi crystals
C. Berger, C. Gignoux, O. Tjernbe, P. Lindqvist, F. Cyrot-Lackmann and Y. Calvayrac 44

Small metallic particles studied by scanning tunneling microscopy
H. van Kempen, J.G.A. Dubois, J.W. Gerritsen and G. Schmid 51

Information on ionic boundary effects by a novel penetration impedance technique
J. Jamnik, H.-U. Habermeier and J. Maier 57

Fermi surface, bonding, and pseudogap in $MoSi_2$
O.K. Andersen, O. Jepsen, Vl.N. Antonov, V.N. Antonov, B.Yu. Yavorsky, A.Ya. Perlov and A.P. Shpak 65

Influence of nonequilibrium phonons on the amplitude of magnetoquantum oscillations in the point-contact resistance
N.L. Bobrov, J.A. Kokkedee, N.N. Gribov, I.K. Yanson and A.G.M. Jansen 83

Extrinsic magnetoresistance in semiconductors
U. Zeitler and A.G.M. Jansen 90

Hall mobility of electrons in insulating liquids
G. Ascarelli 95

Low-frequency edge magnetoplasmons in a ring-shaped two-dimensional electron gas on liquid helium
P.J.M. Peters, P.K.H. Sommerfeld, S. van den Berg, P.P. Steijaert, R.W. van der Heijden and A.T.A.M. de Waele 105

Physics and application of the quantum Hall effect
Klaus v. Klitzing 111

Phonon interactions with magnetically quantized two-dimensional electron systems
L.J. Challis 117

How well is the integer quantum Hall effect understood?
J. Riess 124

Band structure of the spin excitations in modulated heterostructures under strong magnetic fields
T. Maniv, Yu.A. Bychkov, A. Kaplunovsky and I.D. Vagner 134

Hyperfine interactions in quantum Hall systems
I.D. Vagner and T. Maniv 141

A new method for measuring the conductivity of arbitrarily shaped two-dimensional samples
A.P. van Gelder 149

High field magnetization measurements on α-(BEDT–TTF)$_2$KHg(SCN)$_4$
P. Christ, W. Biberacher, H. Müller, K. Andres, E. Steep and A.G.M. Jansen 153

Meissner effect in κ-ET$_2$Cu[N(CN)$_2$]Cl under pressure: Observation of complete reentrance
H. Posselt, K. Andres and G. Saito 159

dHvA studies of $NbSe_2$ using the torque method
E. Steep, S. Rettenberger, F. Meyer, A.G.M. Jansen, W. Joss, W. Biberacher, E. Bucher and C.S. Oglesby 162

Specific heat of 2H-$NbSe_2$ in high magnetic fields
D. Sanchez, A. Junod, J. Muller, H. Berger and F. Lévy 167

Electron pairing and single electron tunneling in mesoscopic superconductors
M. Tinkham 176

Transport properties of niobium–silicon superconductor–semiconductor junctions
Th. Becker, M. Mück and Ch. Heiden 183

Connection rules and electron transmissivity at an interface between materials with different electronic properties
P.C. van Son and T.M. Klapwijk 190

Thermally activated vortex motion in $YBa_2Cu_3O_7$ wire networks
Ph. Flückiger, P.K. Srivastava, B. Jeanneret, Ch. Leemann and P. Martinoli 195

High critical current density in epitaxial $YBa_2Cu_3O_7$ thin films
M. Ye, M. Mehbod and R. Deltour 200

Low temperature scanning tunneling microscopy and spectroscopy of single crystals of the high temperature superconductor $Bi_2Sr_2CaCu_2O_8$, cleaved "in-situ" and at room temperature
H. Hancotte, D.N. Davydov, M. Ye and R. Deltour 206

D-wave superconductor in high magnetic fields
Kazumi Maki, Nils Schopohl and Hyekyung Won 214

Electron–phonon superconductivity beyond Migdal's theorem
L. Pietronero, S. Strässler and C. Grimaldi 222

Heavy fermion superconductivity
B. Lüthi, B. Wolf, D. Finsterbusch and G. Bruls 228

Superconducting phase diagrams of UPt_3 from ultrasonic velocity measurements
S.-W. Lin, J.B. Ketterson, M. Levy and Bimal K. Sarma 233

Point-contact spectroscopy at very low temperatures
Y. de Wilde, J. Heil and A.G.M. Jansen 242

$CeRu_2Si_2$: an example of heavy fermion metamagnetism
S. Holtmeier, P. Haen, A. Lacerda, P. Lejay, J.L. Tholence, J. Voiron and J. Flouquet 250

Spin fluctuations and heavy fermion behavior
U. Wyder 255

3d-XY critical behavior of the layered metal-rich halides Gd_2IFe_2, Gd_2ICo_2 and Gd_2BrFe_2
R. Reisser, R.K. Kremer and A. Simon 265

Giant magnetoresistance in Ag/Co and Cu/Co multilayers with very thin Co layers
R. Loloee, P.A. Schroeder, W.P. Pratt Jr., J. Bass and A. Fert 274

Magnetization-induced optical second-harmonic generation from magnetic multilayers
H.A. Wierenga, M.W.J. Prins and Th. Rasing 281

On the relativistic symmetries of magnetoelectric quasi-moving crystals
A. Janner 287

Magnetoelectric studies of antiferromagnetic crystals in strong magnetic fields
H. Wiegelmann, A.G.M. Jansen, J.-P. Rivera, H. Schmid, A.A. Stepanov and I.M. Vitebsky 292

High field electron spin resonance
L.C. Brunel, A.L. Barra and G. Martinez 298

High-field ESR in the $s = 1$ Heisenberg antiferromagnetic chains of NENP
T.M. Brill, J.P. Boucher, L.C. Brunel, J.P. Renard and M. Verdaguer 303

Non-linear transport and topology of dielectric breakdown
J.C. Maan, B. Willing and P. Uhlig 311

Study of the microscopic ferroelectric properties of copolymer P(VDF-TrFE) films
Li-Jie, C. Baur, B. Koslowski and K. Dransfeld 318

The effect of stimulated emission on the cooling rate of hot carriers in GaAs
P.C.M. Christianen and H.J.A. Bluyssen 325

Time-resolved luminescence of semiconductor heterostructures in high magnetic fields
A.P. Heberle, S. Haacke, M. Oestreich, M. Potemski, W.W. Rühle, J.C. Maan, K. Köhler, G. Weimann and H.-J. Queisser 332

Optical studies of negative-donor centers in quantum wells in high magnetic fields
S. Huant 339

Magneto-polaron effect on shallow donors in bulk GaAs and on D^0 and D^- in GaAs/AlGaAs superlattices
J.M. Shi, F.M. Peeters and J.T. Devreese 344

Enhancement and inhibition of spontaneous emission
G.L.J.A. Rikken 353

Positive spin polarization of the photoelectrons emitted near photothreshold from cesiated Co (0 0 0 1)
J.C. Gröbli, A. Kündig, F. Meier and H.C. Siegmann 359

Purification and single crystal growth of niobium by combined zone refining and electrotransport
E.U. Malang, C.S. Oglesby, T. Siegrist and E. Bucher 363

The discovery of the electric current
Piero Cotti 367
